Import Promotion Desk (IPD)

Cost- and risk-optimised sourcing from new markets

IPD presents 49 selected companies from Colombia, Ecuador, Egypt, Ghana, Indonesia, Jordan, Kenya, Morocco, Peru, Sri Lanka, Tunisia, Ukraine, and Uzbekistan, offering their diverse range of natural ingredients.

IPD is the German initiative for import promotion that connects European importers with these carefully evaluated companies. Our goal is the sustainable and well-structured import promotion of special products from selected developing countries and emerging markets – under compliance with high quality, social and environmental standards.

We introduce producers from our partner countries to the EU market and assist them in setting up trading relations. For European importers we open up new supply markets in the partner countries and support them in the complex purchasing process.

Reduce your initiation, negotiation and control costs with IPD. We have the contacts, information and communication channels to your new suppliers. Our services for you are neutral and **free of charge.**

All IPD companies were carefully selected and then readied by IPD to commence export to the European market. On the following pages you will find detailed information about our reliable suppliers.

We establish direct contact to these new suppliers and organise b2b meetings at Anuga 2023. **Get in touch with us!**

IPD is an initiative of the Federation of German Wholesale, Foreign Trade and Services (BGA) and sequa, the development organisation and partner of German business. We are funded by the Federal Ministry for Economic Cooperation and Development (BMZ).

IPD partners

IPD works with a network of international organisations in Europe and its partner countries. Thus we efficiently pool information and know-how. This enables us to link existing import and export promotion measures and carry out their strategic further development. Our partnerships always make it possible for us to match all services of IPD to the needs of importers and exporters exactly and then carry out our services optimally at any place.

Amapuri

Hall 4.1 | C91

Amapuri is a company that supports small farmers in the production of Amazonian products, such as the acai berry. This fruit is known for its high antioxidant content, which promotes wellbeing and strengthens health.

Through the commercialization of acai, the company promotes sustainable livelihoods by providing alternative employment opportunities to communities in the Amazon and Pacific regions of Colombia. Amapuri highly values the ancestral knowledge of local communities and is committed to the protection of the environment and preserving the biodiversity of the Amazon region.

Amapuri focuses on supporting the local economy through collaboration with communities and social projects. Currently, Amapuri exports to the United States and aims to expand its presence in different markets.

PRODUCTS & QUANTITIES PER YEAR

COLOMBIA

Hugo Restrepo y Cía

Hall 4.1 | C91

Hugo Restrepo & Cía is a Colombian family company, dedicated to the production and export of fermented and aged mashed, pureed, concentrated and dehydrated chili peppers for the food industry and HORECA sectors in the United States, Europe and the Middle East since 1976. They have a diverse portfolio of chilies of different origins, colors and spiciness. Their products are natural, have no artificial additives and can be customized to meet each client's needs.

For the last 47 years, Hugo Restrepo & Cía has successfully produced and exported spicy ingredients through an innovative business model with a social and environmental commitment that benefits farmers across Colombia and Peru.

COLOMBIA

Lazos

Hall 4.1 | C91

From seeds to final products, ManaMana is a family agribusiness based at the heart of the Colombian Andes. As the company's mission statement, the objective of its new range of products is to deliver well-being to its customers in a variety of "supernatural" fruits. All the fruits are grown and processed by a very meticulous handmade technique that takes special care of their aspect and flavor, which are key factors in the final product quality.

ManaMana has a wide range of ready-to-eat fruit products that are used in the HORECA and B2C sectors. Their fruit chunks can be used as an ingredient for cocktails, bakery preparations, and ice cream preparations or can be consumed as a snack ready to be enjoyed at breakfast. Besides, ManaMana develops private labels for retail and food service companies too.

PRODUCTS

- + Chunks (mangoes, papayas, pineapples, bananas)

COLOMBIA

EcoDecisión

Hall 4.1 | C91

EcoDecisión is a private enterprise, constituted in Ecuador, dedicated to developing new ways to fund biodiversity conservation and sustainable rural livelihoods.

Under its Canopy Bridge® brand, the company works to connect producers of sustainable Amazonian food products with new markets and buyers. Since 2017, they have been building a value chain around macambo (*Theobroma bicolor*), a traditional native agroforestry crop.

Closely related to cacao, macambo is a delicious, nutrient-rich seed that can be consumed as a snack or as a nut alternative and incorporated into chocolate making. This 2023 season, they are working with over 500 indigenous and rural women farmers to process macambo and other amazing food ingredients.

PRODUCTS & QUANTITIES PER YEAR

+ Macambos / 3t

SOURCE OF RAW MATERIAL

+ From over 500 indigenous and rural producers, predominantly women in the Amazon region of Ecuador

ECUADOR

Healthy Food

Hall 4.1 | C91

Healthy Food is a manufacturer of fruit-based products such as pulps, sauces and jams, produced under the highest quality standards. Given Ecuador's geographic location, over 19 fruits are offered all year long. Healthy Food provides solutions for the most demanding customers.

Stakeholders in the food industry are increasingly exposed to more diverse knowledgeable consumers and greater regulatory controls. Healthy Food solves these needs by getting involved throughout the whole production cycle and guaranteeing food safety, traceability, social and environmental sustainability, and R+D at competitive prices.

PRODUCTS & QUANTITIES PER YEAR

- + Pineapple pulps
- + Passion fruit pulps
- + Soursop pulps
- + Berries

In total: 1,800t

CERTIFICATIONS

- + FSSC 22000

Allord Manufacturing

Hall 4.1 | C91

Allord Manufacturing company was established in 2018 and specializes in producing premium quality processed fruits and vegetables. It offers its wide range of products all year round, by using IQF technology to freeze fruits and vegetables while preserving their natural flavors, fresh vitamins, and minerals. The company uses a fully automated technique to remove the skin from the fruits and then squeeze the juice using cold press technology. All their products are natural and free of preservatives and additives.

The company has its own farms and supplies additional fruits and vegetables from certified farms.

Allord's B2B clients include juice and pastries factories that are looking for processed/concentrates fruits products. And B2C customers are looking for fresh natural and healthy products.

PRODUCTS & QUANTITIES PER YEAR

- + Strawberries (frozen) / 3,000t
- + Mango slices & chunks (frozen) / 1,500t
- + Orange juice (frozen) / 1,000t
- + Pomegranate juice (frozen) / 500t
- + Guava juice (frozen) / 200t
- + Frozen fruit purees (mangoes, strawberries, oranges) / 2,000t
- + Freeze-dried fruits (mangoes, strawberries, oranges, guavas) / 15t

Zalli Foods

Hall 4.1 | C91

Zalli Foods is an agro-processing company that develops and produces nutritious snacks made from African fruits and superfoods. The company was launched in early 2017 with its line of Toasted Coconut Chips under the SOA | Snacks of Africa brand. It also produces high quality fruits (mango and pineapple) for bulk and wholesale distribution.

The company stands on 3 pillars of impact:

- + Women & youth empowerment: Zalli Foods is woman owned and operated with 70 % of its workforce being women and 100 % under the age of 30.
- + Stable market access for smallholder farmers (80 % of Ghana's coconuts are produced by smallholders).
- + Contribution towards the diversification of Ghana's industrial sector beyond gold and cocoa production.

PRODUCTS & QUANTITIES PER YEAR

Bulk dried fruits:

- + Mangoes / 10t
- + Pineapples / 10t
- + SOA toasted coconut chips / 15t
(50g pouches x 300k)

Adore Rempah

Hall 4.1 | C91

Adore Rempah Indonesia is a vanilla producer located in the heart of the vanilla farms on Sulawesi Island. Committed to sustainability and inclusivity, Adore has direct access to impose high-quality raw material selections, while its farmers benefit from improved welfare.

Complemented by standardized curing methods, Adore ensures consistent production of remarkable vanillin-rich vanilla, achieving up to 3.8% vanillin content (for its crystallized/frosted vanilla beans) with an average of 2%. Adore solves the low-quality vanilla problem in the market (where most vanilla barely reaches 1.3%), providing its customers with peace of mind through a vanillin content guarantee.

Adore's vanilla has been distributed to some world's famous pastry chefs, stores, and extraction companies, reflecting exceptional quality.

PRODUCTS & QUANTITIES PER YEAR

- + Vanilla beans gourmet grade / 10t
- + Vanilla beans extraction grade / 20t
- + Vanilla beans crystallized / 2t

INDONESIA

Berkat Petani Indonesia (Gulapa)

Hall 4.1 | C91

Berkat Petani Indonesia (Gulapa) is a manufacturer of high-quality coconut sugar. The company name comes from their mission to be a blessing and increase the life standard of local farmers in Central Java by partnering up with them and giving back to society.

Coconut sugar is produced by collecting the sap from the flower bud of the coconut palm tree. Not only is it a healthier alternative, but it is also a more sustainable option, as coconut palms are a renewable resource that requires minimal inputs and can be grown in diverse agroforestry systems. In Indonesia, coconut sugar has been used for centuries as a traditional sweetener.

Gulapa's role is to support and maximize the local community by working together with Non-Governmental Organization as they strive to improve the prosperity of the local community.

PRODUCTS & QUANTITIES PER YEAR

Integrated Agricultural Projects supported by GIZ

Hall 4.1 | C91

Integrated Agricultural Projects

The Integrated Agricultural Projects (IAP) began from a seed enriched with the goods of the Jordan Valley. The company which is operating under the brand name “Karamah – Jordan Valley” embarked on a journey seeking a story of success, initiated from the deep roots of Jordan and out into the wide world.

At IAP, they focus on the quality and excellence of their products and the dates are usually grown in a healthy agricultural environment. Aside from being planted at the lowest point on earth, away from sources of pollution, to ensure the production of high-quality organic crops, the IAP employs a team of workers and specialists who bring their wide knowledge and experience all together to manage the agricultural process and its following activities. Following the principles of social responsibility, IAP makes sure to employ the most sustainable agricultural practices, leading its way to the top of the dates market.

JORDAN

Jana Dates supported by GIZ

Hall 4.1 | C91

Jana Dates is a company in Jordan, specializing in date palms, and date production, in addition to packaging and exporting high quality Medjoul dates. Medjoul is one of the most splendid and well-known dates in the world (known as king of the dates), its caramel flavour has made it a household favorite. The company was established in 2008, and now owns 100 ha of land in the Jordan Valley and they produce around 650 tons a year.

Jana Dates has established model farms based on the latest trends that include modern irrigation systems, water purification treatment, a highly qualified team of engineers, supervisors and workers in addition to a universal quality packaging unit to satisfy their clients in and outside Jordan. The company's dates are graded in different categories; premium A (super jumbo, jumbo, large, medium and small), delight and other categories according to the level of loose skin and moisture. Its dates are cleaned, sorted, packaged, according to the highest international standards and then transported to our clients in cooled containers at -18 degrees.

Milly Fruits Processors

Hall 4.1 | C91

Milly Fruits Processors was established in 1988 in Mtwapa, Kenya and is part of the Milly Group, which has interests in manufacturing and real estate in Kenya and the United Arab Emirates. The company produces and distributes fruit juices locally under their brand Picana.

The company began as a fruit processor with equipment from the Italian company Bertuzzi Spa. Milly Fruits Processors started with pulps and concentrates of mangoes, passion fruits and pineapples. The company works with a strong network of farmers to source fresh fruits and vegetables for its production. With the ambitions to broaden their food security goal, they are in the process of establishing a 1,000 acres farm and have an additional 7,000 acres available for cultivation.

In addition to the puree and concentrate production line, they are currently setting up a 400t (output) dehydration plant for export products. Their midterm future plans include a move into individually quick-frozen products.

PRODUCTS & QUANTITIES PER YEAR

- + Mango pulps and concentrates / 500t
- + Passion fruit and pineapple pulps / 300t
- + Dried fruits (mangoes, pineapples, coconuts planned for 2024) / 100t

MOROCCO

Inka Fresh

Hall 4.1 | C91

Inka Fresh is a family-owned company that grows, processes, and exports high quality dehydrated fruits, vegetables, herbs and spices from the highlands and rainforests of Peru.

The fields and processing plant are located closely together, in such a manner that peak harvest and post harvest quality are maintained before processing. The plant is located in Satipo, in the central jungle of Peru. The tropical weather of the zone (rainforest) allows for year round production. The company is vertically integrated, from the fields to final export destination, in such a way that complete traceability is guaranteed for the products.

Inka Fresh owns a storage and sorting facility close to the shipping port that allows consolidation of the export containers. Founded in 2004 they have continually expanded their operations mainly in North America and are now targeting to expand operations in Europe.

PRODUCTS & QUANTITIES PER YEAR

- + Black and green tea (Camellia sinensis) / 200t
- + Ginger slices, granules, powders (dehydrated) / 200t
- + Orange slices, granules, powders (dehydrated) / 200t

Tazart

Hall 4.1 | C91

Founded in 2015, Tazart is an agri-food company specialized in dried figs from the mountainous North and the drier South of Tunisia. The name Tazart comes from the Amazigh, the original culture of North Africa, and it means "dried fig". Through direct relationships with farmers, Tazart is able to offer quality products by supporting farmers from planting and maintenance of the trees until the harvest of the fruits.

Tazart has won the gold medal for the best dates and dried figs in 2 editions of the Tunisian local products competition. The company sources high quality Deglet Nour dates and also processes them into derivatives. Tazart's "Zidi" as well as the "Bayoudhi" figs are specialty products naturally dried directly on the trees. The company's vision is based on 3 axes: social and ecological responsibility, the value of natural products, the value of good food ingredients.

PRODUCTS & QUANTITIES PER YEAR

- + Natural dates Deglet Nour / 350t
- + Natural dried figs in wooden boxes (Bayoudhi) / 20t
- + Dried figs "Toujane" (Bayoudhi) / 35t
- + Dried figs "Zidi" (Zidi) / 6t
- + Dried figs "Djebba" (Bouhouli) / 15t
- + Date syrup / 50t
- + Date sugar / 80t
- + Date stones coffee / 120t
- + Date paste / 500t

CERTIFICATIONS

- + ORGANIC (EU) (in process; for dates)
- + FSSC 22000

Amethyst-Ole

Hall 4.1 | C91

AMETHYST *Ole*

Since 2011, Amethyst-Ole has been committed to supplying high quality frozen berries as an ingredient for the F&B industry. It has taken years of research and development to establish its best practice and sustain a successful supply programme. As part of commitment, Amethyst-Ole constantly strives for the highest domestic and international certification standards in the food industry. From field and forest to harvest and throughput production, Amethyst-Ole ensures food safety standards and effective traceability for both its organic and conventional products.

As of today, the company has 3 freezing chambers with a total capacity of 40 tons and 2 storage chambers where up to 700 tons of produce can be stored at the same time. Two powerful production lines for electronic berry sorting are in use at the facility. With state-of-the-art equipment and professional teamwork, Amethyst-Ole is able to manufacture up to 30 tons of frozen produce daily and up to 2,000 tons a year.
