# Import Promotion Desk (IPD)

## Cost- and risk-optimised sourcing from new markets

VISIT US!  
BOOTH  
6E06

IPD presents 33 selected companies from Colombia, Côte d'Ivoire, Ecuador, Egypt, Ethiopia, Ghana, Morocco, Peru, and Ukraine, offering their diverse range of fresh produce.

IPD is the German initiative for import promotion that connects European importers with these carefully evaluated exporters.

Our goal is the sustainable and well-structured import promotion of special products from selected developing countries and emerging markets – under compliance with high quality, social and environmental standards.

We introduce exporters from our partner countries to the EU market and assist them in setting up trading relations. For European importers we open up new supply markets in the partner countries and support them in the complex purchasing process.

### **Reduce your initiation, negotiation and control costs with IPD.**

We have the contacts, information and communication channels to your new suppliers.

Our services for you are neutral and **free of charge**.

All IPD companies were carefully selected and then prepared by IPD to commence export to the European market.

On the following pages you will find detailed information about our reliable exporters. We establish direct contact to these new suppliers. We offer virtual b2b meetings with some of our exporters and also personal meetings at the trade fair.

### **Get in touch with us!**

IPD is an initiative of the Federation of German Wholesale, Foreign Trade and Services (BGA) and sequa, the development organisation and partner of German business. We are funded by the Federal Ministry for Economic Cooperation and Development (BMZ).

More information about IPD and our individual services at [www.importpromotiondesk.de](http://www.importpromotiondesk.de)

# IPD Partners

IPD works with a network of international organisations in Europe and our partner countries. Thus we efficiently pool information and know-how.

This enables us to link existing import and export promotion measures and carry out their strategic further development. Our partnerships always make it possible for us to match all services of IPD to the needs of importers and exporters exactly and then carry out our services optimally at any place.

# Casvel Hass and Fruits

Casvel is a family business based in Quindio, Colombia, a region with highly favorable conditions for the production of Hass avocado and known for its strategic location in the center of a triangle between Colombia's three main cities.

We are committed to a responsible use of the environment and seek to have a positive social impact in our community and region. In production, we place a lot of emphasis on plant health, good soils and balanced nutrition for our trees.

Casvel understands the needs and quality requirements of its customers and the final consumer. Therefore we focus on an optimal post-harvest handling, selection, and packing process and guarantee a functioning cold chain from packing to the final destination.

COLOMBIA

# Colombian Fruit Group

Colombian Fruit Group is an exclusive organic enterprise that grows and exports fruit since 2016 to the EU market. CFG has a deep belief in the importance of fair and ethical agricultural practices and protects the harmony of the ecosystems where the fruit is cultivated. Furthermore, the company empowers producers and small producer groups to obtain international certifications. With their assistance and guidance they assure a wide variety of excellent organic certified fruit. CFG looks for and takes special care of sustainable and long-term business relations. Their main goal is to let costumers enjoy all year long new and more exotics fruits by constantly increasing their production with international certifications. They do air shipments only. Quantities are frequently increasing and are flexible towards your marketing/packing preferences.

COLOMBIA

# De los Angeles Investment

De Los Angeles Investment was established in 2015 in the city of Bucaramanga with the goal to export high quality fresh produce from Colombia to the world. They are part of a grower's association for limes in the region of Santander with control over the whole process from production to packing and shipping.

Through GLOBALG.A.P., GRASP and ORGANIC certification De Los Angeles Investment assures good agricultural, environmental and social practices and guarantees the highest quality and 100% traceability of the products. At the moment, the company has 200 hectares of lime in full production. The newest addition to the product portfolio is organic pineapple. Currently, they are working on getting SMETA certified.

In addition to its own production, De Los Angeles Investment has formed long-standing strategic trusted partnerships with GLOBALG.A.P. certified avocado producers and packers in the regions of Antioquia and Tolima.

COLOMBIA

# F&P Trading

F&P Trading was founded in 2017 and is specialized in growing, packing and commercializing Hass avocados grown mainly in Tolima and other regions in Colombia suitable for the production of this crop. Its mission and values focus on creating sustainable and responsible business and decent work for their stakeholders and workforce on the farms. F&P Trading has experience in exporting to demanding markets such as the Netherlands and Italy, and have successfully introduced their own unique brand TROPIDELI.

Their packing house is located in the historical town of Armero Guayabal which in 1985 was struck by a natural catastrophe caused by the eruption of the Nevado del Ruiz volcano. Since then, the region has been struggling with the aftermath. F&P Trading is contributing to the economic development in Armero Guayabal generating income opportunities especially for vulnerable people. In fact, 90% of their workforce is made up of single mothers. Now the company is looking for a partner in Europe which values not only F&P Trading's high-quality product but also their social commitment and is interested in developing and growing their businesses together.

# Montana Fruits

Montana Fruits was founded in August 2018. The team is composed of an interdisciplinary group of experts in different areas such as supply chain, planting, sourcing, selection, packaging, logistics, all the way to the commercialization.

Montana Fruit differentiates themselves from the rest of the market by establishing their own quality standards that surpass the basic normativity, as well as by offering technical support, assistance and a chance to observe the packing process to our growers and clients.

Montana Fruit is located in Guarne, Antioquia.

They have 50 direct and 80 indirect employees.

The packing house is 2,400 mt<sup>2</sup> (25,833,39 feet).

Capability of process : 12 containers per week of avocado and 2 of passion fruit.

# Ivoire Ecosol (Ivesol)

Created in 2018 in Côte d'Ivoire, Ivesol's primary objective is to promote organic farming in a context of rational management of soil and water. With great experience in the agricultural world and export systems of exotic fruits by plane and boat

from Abidjan, Ivesol aims at developing ecological solutions of soil management, together with European technical and financial partners. This will improve the living conditions of the producing population and support the delivery of fresh organic fruit produced and packaged according to the international standards in force.

The company's long-term vision is to reduce the poverty in the rural world by enhancing the quality of the products and obtain fair prices on the world market. To achieve this, Ivesol works in close collaboration with a hundred small farmers who are supervised and grouped into agricultural cooperatives such as Scopaci- Scoops and IMS FRUITS.

# Natural Products Import-Export

Natural products Import-Export is an international trading company focusing on agricultural products. The company is GLOBALG.A.P. certified (crops and packing station). It is registered in Ivory Coast with a representation in Canada. Its long-lasting partnerships with farmers and cooperatives allow the organization to supply companies in North America and Europe.

Natural Products is a supplier of different tropical products. The product is always fresh, well mature and available all year round. Products are carried by vessel in reefer sea cans with a temperature around eight degrees Celsius to keep the freshness of the product. As per clients need, the packaging can be done with polypropylene bags or cartons. The produce is then placed on secured wooden pallets to avoid damage during transportation. Deliveries can also be made under different incoterms according to the client's need. Quality, safety, trust, flexibility and on-time delivery are the main qualities.

## PRODUCTS & QUANTITIES PER YEAR

+ Coconuts / 1,800 t

## CERTIFICATIONS

+ GLOBALG.A.P.

# Golden Sweet Spirit / TANKAY

Goldenberries are an amazing product from Ecuador very rich in flavor. By teaching small farmers the sustainable production of this ancestral superfood in their Golden Berry School, and by helping them export it to international markets, the company offers income opportunities in the rural areas of Los Andes, the center of the world, while at the same time contributing to social community development and playing their part in preventing negative impacts on the climate and environment.

GLOBALG.A.P. is their standard for quality, and not only do they have additional social certification, but they have social responsibility written in their company's DNA. With 22 years of experience in producing and developing this crop in Ecuador, they are now ready to share all the benefits of this fantastic fruit with the rest of the world.

ECUADOR

Sula is a tropical fruit export company in Ecuador. The main products are bananas, baby bananas, red bananas and plantains. The company exports every week of the year: 52 weeks. Sula is focused on sustainability. The export programs are environmentally friendly and fair to the communities. Sula carries out programs focused on health and education for small grower families, implements measures to reduce water consumption during the processing of the product, and increases soil biodiversity by organic agricultural practices. The commitment to people and the environment is reflected in its Fairtrade and Organic certifications.

By challenging but also offering training and support to its producers, Sula satisfies customer demand for high quality products while at the same time continuously improving the operation. The current markets are Europe and USA.

# Ghana Yam Producers and Exporters Association (GYPEA)

Established in 1987, the GYPEA is the umbrella organization of yam producers and exporters in Ghana. They coordinate the activities of all registered yam producers and exporters, identify growing areas and interact with growers to ensure product quality and traceability and they play an advocacy role in lobbying to influence government policy in the yam industry.

Strategically positioned in the middle of the yam value chain they control the movement of GLOBALG.A.P. certified yams from farm gate to foreign markets. They export good quality fresh yams in their specially designed cartons to the UK, Europe, USA and Canada. A subsidiary company known as the GYPEA Primus Company has registered coconut farmers at a location near the Ivory Coast border and exports coconuts to the UK, Europe and the USA.

# Kwafre Farms

Kwafre Farms is a privately owned farm in Ghana, West Africa with focus on the production of high-quality tasty, sun-ripe mango fruits. They have highly qualified agronomists and other skilled staff focused on producing fruits safely and responsibly. Their 400 acres mango farm is GLOBALG.A.P.-certified and they produce 700 tons annually with Keit and Kent as main varieties. Harvesting period is from May-August each year with fruit sizes between "count 6 to count 10" in a pack with average weight being 400-700g.

The company currently sells some fruits to 2 European-owned processors (Blue Skies and HPW) based in Ghana who sell the processed fruits to Europe. However, Kwafre plans exporting fresh fruits directly to EU. Kwafre Farms performs measures to support the environment and biodiversity, e.g. by adding and managing teak and acacia tree plantations on the farmsite.

MOROCCO

# Coopérative Al Amal

supported by giz

A L A M A L

Al Amal is a Moroccan cooperative specialized in the production of fresh and dried aromatic and medicinal plants. The cooperative was created in 1998 originally for the production of argan oil.

In 2015, the cooperative has launched a production project of organic Mint and Goji-berries on a total area of 27 hectares. The production site is based in the north of Morocco with only 14 km away from the European continent. This optimal geographic location allows the cooperative to deliver fresh products throughout the whole harvest season in highest quality to Europe.

# Horifaya – a brand of Lukus

supported by giz

Lukus' agricultural activities started in 1927 near the Loukkos riverbank in northern Morocco, expanding over more than 3000 acres land. Today, Lukus operates under Horifaya and delivers international produce markets and major food industries all over Europe, the Middle East and Northern America.

Horifaya's mission is to foster innovation in agriculture through the introduction of new varieties, new technologies and sustainable agriculture techniques. In the spirit of developing Lukus' business in accordance with environmental and social needs, Horifaya introduced "Lukus organic". All Lukus organic products are AB certified. With 120 hectares of land dedicated to nursery, Horifaya can satisfy customers' requirements from seed to delivered products with complete traceability and close quality monitoring at each stage. Produce is harvested and processed following HACCP and international sanitary guidelines. We are equipped to meet a wide range of processing and packaging specifications, from 5 kg to 100 g, whole or cut. Besides fresh produce, Lukus offers a variety of frozen fruits and vegetables.

Both fresh and frozen produced are available in conventional and AB certified organic.

# Agrícola Nuestra Tierra

**Cultivemos**  
*Nuestra Tierra*

Cultivemos (Agrícola Nuestra Tierra ) is a team of experts in the agroexport business with more than 12 years of technical hands-on experience.

They started their journey in 2008 working with groups of small organic growers in the north of Peru. In 2019, they decided to establish their own agroexport company to get more control over quality, reliability and sustainability.

From the beginning, the company mission was the development of their growers, team and clients, with a special focus in establishing strong and trustworthy business relationships all the way into the supply chain (bottom to top).

Quality assurance, flexibility & customer service are key in the company.

# Agroexportadora Don Eloy – Agroexdel

Agroexportadora Don Eloy is a Peruvian family owned company, established in 2019 as a result of vertically integrating the foreign trade operations of the Don Eloy Group. The company has 40 years of experience in agricultural production and packaging in its estate. Agroexdel fulfills Don Eloy's family dream of bringing the best fruits from the dry tropics of Peru to every home in the world.

Don Eloy ensures food safety, control and supervision of the different stages of the production process and provides the client with a premium quality of products at a fair price. The company strives to achieve the best results and service through the responsible management of human resources and nature. Don Eloy is committed to the satisfaction of their customers and the safety of their goods – this is reinforced by having a logistics operator as a strategic partner. Currently, Don Eloy supplies its products to the United States, The Netherlands, Germany, Sweden and Panama.

# Frunature Perú

Frunature Perú SAC has more than 10 years of experience in cultivation and agriculture techniques. They started as an association in 2010. Later, in 2015, they founded the company Frunature Perú and created their brand Tibana – the flavor of the sun. In 2017 Frunature Perú decided to implement and certify their organic farming for the EU and USDA-NOP standards.

The company is committed to provide high quality organic products, according to the consumer's needs. They offer a constant supply throughout the year, achieving the sustainability and growth of their circles of influence. Frunature Perú provides work and support to many families in the communities of the central Peruvian rain-forest. They are working with dedication and passion for the continuous technological improvement of their crops, thus obtaining long-term commercial relationships with their strategic partners.

Inkawald is a family owned and run company, which implements organic farming and operates ecologically sustainable. They export their organic products to Europe, Canada and the US. Inkawald commercializes superfoods, respecting the environment, practicing sustainable agriculture and having as its main resource its producers and workforce. Throughout the process they take care of social responsibility, the environment and fair trade principles with their suppliers. Inkawald only cooperates with local farmers. In their processing plant the majority of workers are women and neighbors of the area. They promote a good working environment and fair relations between workers. Inkawald prevents contamination of the ecosystems by respecting the natural crop cycles. They produce in a healthier manner because their products are free of toxic waste from chemical pesticides, fertilizers or synthetic additives, protecting the health of consumers and farmers.

PERU

Tropic-X owns organic farms in the Peruvian jungle, including one of the biggest organic specialty coffee farms in the country. Apart from coffee, Tropic-X also produces and processes organic fresh ginger and turmeric as one of its many businesses. Their production is growing due to the increasing global demand for these products. Farm and processing and packing plant are certified with several international certifications and, in addition, authorized and certified by SENASA, the national agricultural health service.

Besides producing high value crops, Tropic-X's work model has amongst its main pillars the development of agricultural technology. Focusing on sharing it with smallholder farmers to reduce the yield gap and contribute to the empowerment and development of associated farming communities.

# Vancard Perú

Vancard Perú was founded in 2019 to improve the economic conditions of farmers in the Central Forest of Peru. They are committed to generate added value and to promote the industrialization of agricultural products for export. Vancard continually strives to establish high standards in the areas of traceability, food safety, organic supervision and well-being for our workers.

The company grows, processes, sells and exports high quality organic products from their own fields and agricultural communities who they work with and who are their strategic partners. The company consists of producers with experience in the production of Ginger and Turmeric; and a staff of professionals specialized in agro-export and quality systems to generate its sustainability. Vancard Perú is proud to operate in an ethical way that supports local farmers and improves the quality of life for surrounding communities while remaining committed to environmental responsibility.

# Danube Agrarian

Danube  
Agrarian

Danube Agrarian is located in a geographically advantageous place in the very south of Ukraine. Its unique location on the 45th parallel makes the fruits notably sweet and the vegetables very tasteful. Danube Agrarian was certified as organic producer in 2010 and owns about 2,000 hectares of organic land, part of which is irrigated.

The company has 50 employees throughout the year and about 100 additional staff members during the high season. All the products are being produced according to the standards for organic production. The process of harvesting, processing and storing meets all organic certification requirements.

## PRODUCTS & QUANTITIES PER YEAR

- + Watermelons, nectarines, peaches, plums, cantaloupes / 5,000t
- + Sweet potatoes, potatoes, onions, beets, carrots, peppers, tomatoes, peas, chickpeas / 5,000t
