# Import Promotion Desk (IPD)

## Cost- and risk-optimised sourcing from new markets

VISIT US  
IN HALL  
**7.2 F50**

IPD presents 13 selected companies from Ecuador, Ethiopia, Indonesia, Morocco, Sri Lanka, Tunisia, Ukraine, and Uzbekistan – offering their diverse and high-quality range of natural ingredients.

IPD is the German initiative for import promotion that connects European importers with these carefully evaluated exporters. Our goal is the sustainable and well-structured import promotion of special products from selected developing countries and emerging markets – under compliance with high quality, social and environmental standards.

We introduce exporters from our partner countries to the EU market and assist them in setting up trading relations. For European importers we open up new supply markets in the partner countries and support them in the complex purchasing process.

**Reduce your initiation, negotiation and control costs with IPD.** We have the contacts, information and communication channels to your new suppliers. Our services for you are neutral and **free of charge**.

All IPD companies were carefully selected and then readied by IPD to commence export to the European market. On the following pages you will find detailed information about our reliable exporters.

We establish direct contact to these new suppliers and organise b2b meetings at the trade fair. **Get in touch with us!**

IPD is an initiative of the Federation of German Wholesale, Foreign Trade and Services (BGA) and sequa, the development organisation and partner of German business. We are funded by the Federal Ministry for Economic Cooperation and Development (BMZ).

# IPD partners

IPD works with a network of international organisations in Europe and its partner countries.

Thus we efficiently pool information and know-how. Our partnerships enable us to tailor our services exactly to the needs of European importers.

# Uchu Spice – Proaji

Based out of South America, the cradle of hot peppers, Uchu Spice has over 35 years of experience producing and processing a wide variety of chili peppers. Every time you enjoy Uchu chili peppers, you are part of a supply chain with 600 independent smallholder farmers across Ecuador and Peru.

With strict supply chain management from heirloom hot pepper seeds to its processing facility, the company's products are fully traceable to bring you complete confidence. They process various peppers into dried whole, flaked, powdered, smoked, brined, mashed, and pureed forms. From mild to super hot, for spicy food creators around the world.

Although Uchu believes its existing product's quality and diversity is unparalleled, the company's innovative roots and spirit are still active. If one of the existing products is not exactly what you are looking for, reach out to them anyway – Uchu loves challenges that trigger the imagination and create something new, just for you.

## PRODUCTS & QUANTITIES PER YEAR

# Adey Meselesh

The start-up Adey Meselesh was founded in December 2020 by Daniel Feseha Melesse in Ethiopia and exports environmentally friendly spices. From the beginning, the start-up focussed not only on spices but also on IT solutions supporting the production processes and traceability of the products. The spices business unit focuses on developing great products: training local farmers on market requirements and customer demands, developing cost-effective and environmentally friendly packaging materials to maintain product quality, and developing energy-saving machines such as solar dryers and solar grinders. The IT business unit offers blockchain solutions for traceability and regulatory compliance in the supply chain. The solution includes an ERP system to manage and transmit product information or digital transactions via smart contracts in the blockchain (Hyperledger Fabric).

# 4 Seasons Mediterranean Aromas

4 Seasons Mediterranean Aromas (4SMA) is a supplier of high-quality herbs to the cosmetic, botanical extract, spices and pharmaceutical industry. 4SMA specializes in the cultivation and wild collection of more than 40 dried aromatic herbs. The company has over 26 years of experience in growing and exporting aromatic herbs and is located in Morocco, a stone throw away from the south of Europe. This geographical position allows them to efficiently serve clients throughout the world.

In its own farms, 4SMA cultivates rosemary varieties, which show high levels of carnosic acid and antioxidants. Wild herbs are collected from the natural wild habitats in the heart of the Atlas and Rif Mountains.

## PRODUCTS

Cultivated:

- + Rosemary leaves / 50-70t
- + Lemon verbena / 70-90t

Wild collection:

- + Rosemary / 800-1,200t
  - + Thyme / 500-600t
  - + Oakmoss / 100-120t
  - + Pennyroyal mint / 50-70t
- and over 40 other aromatic herbs

## CERTIFICATIONS

- + ONSSA

## SOURCE OF RAW MATERIAL

- + Own cultivation and wild collection from the Atlas and the Rif Mountains

MOROCCO

# Dumbara Natural Foods

Dumbara Natural Foods is a company that manufactures the unique organic natural sweetener "Kithul" in high-quality, as well as jackfruit-based products in Sri Lanka.

Kithul is a palm endemic to Sri Lanka's rain forests. Botanically it is known as "Caryota Urens". The Kithul tree provides several uses and is thus a multipurpose tree. The sap obtained by tapping the inflorescence is used to make various edible products including sweet kithul treacle and kithul jaggery.

Dumbara aims at supporting the 400 rural farmers in Sri Lanka, uplifting the farming community's living standards, and offering their children better education. The company assists in maintaining organic plantations, providing relevant knowledge and guarantee to take in their Kithul sap and natural ingredients. The objective is to create better awareness of this hidden valuable ingredient. Kithul is considered as "Liquid Gold" because of its unique taste and low glycemic index value.

## PRODUCTS & QUANTITIES PER YEAR

- + Kithul syrup / 60t
- + Kithul jaggery / 40t
- + Kithul flour / 10t

## CERTIFICATIONS

- + ORGANIC EU (in process)
- + HACCP

## SOURCE OF RAW MATERIAL

- + Kithul treacle is sourced directly from small scale producers in Sri Lanka

# Actifs Précieux

Booth 6.G30 + 7.2L34

Actifs Précieux produces premium food and health ingredients made exclusively from botanicals. The company is a pioneer in supercritical fluid green technology (SFE) in Africa, applying high pressure and low temperature processes.

Actifs Précieux offers pure functional nutritional extracts, active health ingredients and tailor-made solutions from lab to industrial scale.

It brings not only functional properties but also flavours.

The extracts are 100% free of known or suspected toxins and are highly effective giving maximum functionality at the lowest dosage level.

The company is committed to sustainable business practices advocating for ethical ingredient sourcing and environment friendly processes that are traceable and compliant with certified organic production guidelines.

Actifs Précieux' CO<sub>2</sub> supercritical extracts have a wide range of applications in the functional nutrition, wellness, and cosmetics sectors.

TUNISIA

Agrofit is a Ukrainian company founded in 2001. At first the main goal of the business was to grow peppermint with high quality characteristics. Gradually, the company expanded the range of products and began to grow many other herbs in large volumes. Today Agrofit is the largest producer of medicinal herbs in Ukraine. Raw materials produced by Agrofit are used in the pharmaceutical, food and perfume industries. Agrofit has 20 years of experience in the market, uses advanced technologies and produces large volumes of high-quality, organic and conventional products. Agrofit cultivates natural herbs on its own fields that occupy about 100 hectares. Plants are grown in environmentally friendly conditions. The quality of herbs meets the current modern European requirements. The fields of Agrofit are cultivated according to organic standards and are officially in conversion.

# Agrooil Ukraina

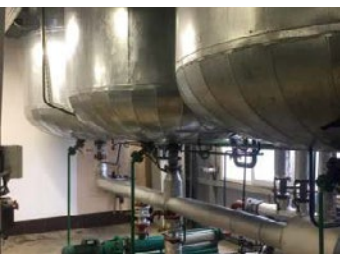

Agrooil Ukraina is fully dedicated to sunflower lecithin from Ukraine.

The plant uses modern equipment ensuring a high-level quality of the product, with minimal harmful effects on the environment.

Sunflower lecithin is produced from Non-GMO kernels and is hypoallergenic which is becoming more important; microbiological indicators and the contents of heavy metals of the product comply with the European standards.

The company ships lecithin in a liquid form in specially-fitted tank trucks, in flexi tanks with preheating, in IBCs, SpaceKrafts and MS drums.

Agrooil Ukraina actively supplies customers in more than 10 countries worldwide.

UKRAINE

Phytocom is a family-owned company, based in Poltava (Ukraine). Its fields and production facilities are located 120 km from Poltava to the South. The main activities of Phytocom are medicinal herbs cultivation, primary processing and supplying. The dried raw materials can be used in pharmaceutical, food, fragrance-cosmetic and animal feed industries. Licensed agronomists and research officers of the company constantly conduct selection activities, work on improvement of technological growing processes and processing of raw materials. 20 years of experience in the cultivation of different plants allow Phytocom to provide herbs of the highest quality, homogeneous, pesticides are not applied. Each step of the production is controlled: from seeds harvesting, planting to packing and dispatch. The raw material is dried artificially straight after harvest by warm air at floor dryers and packed in polypropylene bags. Based on the requests of partners, the range of products is constantly being widened. Phytocom also grows herbs under contract.

# Mountain Herbs

The basic sphere of the company "Mountain Herbs" is a collection of wild-growing mountain herbs and their subsequent processing. The company offers dried medicinal plants, phyto teas, natural essential oils and hydrolates applied in pharmaceutical, perfumery-cosmetic and the food industry. The offered herbs grow in remote areas of Uzbekistan (Chatkal crest of Tian-Shan mountains) at 1,000-3,500m altitude, i.e. in such places, where human activity is impeded and therefore neither pesticide nor herbicides and other poisoning chemicals can be applied. The plant material reaches the processing site within 3-12 hours where manufacture is promptly initiated.

## PRODUCTS & QUANTITIES PER YEAR

Essential oils and dried herbs:

- + Hypericum scabrum / 100-300l
- + Achillea millefolium / 100-300l
- + Origanum tyttanthum / 300-500l
- + Artemisia dracunculus / 3,000l
- + Juniperus seravschanica / 1,500l
- + Ziziphora pedicellata / 300-500l
- + Artemisia cina & persica / 100-300l
- + Mentha longifolia / 500-1,000l
- + Perovskia angustifolia / 1,000l

## SOURCE OF RAW MATERIAL

- + Wild collection
