Organic sourcing for development

Discover the organic potential from developing and emerging countries!

Since 2015, **Import Promotion Desk (IPD)** – the German initiative for import promotion – and the international service provider **Gesellschaft für Internationale Zusammenarbeit (GIZ)**, have been present at BIOFACH with a joint stand.

Under the motto “Organic sourcing for development” we connect German and European importers with selected exporters from developing and emerging countries.

At BIOFACH 2024, we are showcasing more than 50 innovative companies from Burkina Faso, Colombia, Côte d’Ivoire, Ecuador, Egypt, Ethiopia, Ghana, India, Indonesia, Kenya, Madagascar, Morocco, Mozambique, Peru, Senegal, Sri Lanka, Tunisia, and Ukraine.

Our suppliers bring a wide variety of high-quality organic products to Nuremberg.

Take a look at the product finder starting from page 10, which gives you an overview of the available products.

Take advantage of **BIOFACH 2024** and visit us at our booth in **hall 3A-325** – there we will put you in direct contact with exporters that are of interest to you.

This year we will also be exhibiting at **VIVANESS**, the international trade fair for natural cosmetics, which takes place at the same time as Biofach. Visit us here too and meet our companies in **hall 3C-032**.

On the following pages you will also find detailed information about the IPD evaluated exporters and the companies supported by GIZ.

Import Promotion Desk (IPD)

Open up new markets and find reliable business partners

Regardless of whether you require natural ingredients for foods, pharmaceuticals or cosmetics: High-quality products are the only way to satisfy the high demands of consumers.

It is therefore crucial to find the right suppliers throughout the world. Import Promotion Desk (IPD), the initiative for import promotion, supports you exactly in this.

On your behalf, we undertake the international sourcing of reliable trade partners in selected partner countries.

We identify highly promising producers for you who are able to reliably meet the demand on the European market. We prepare the suppliers thoroughly for the EU market: considering factors such as product quality, exportability, export capacity, and compliance with international standards and certification.

Thanks to our preparation, you will meet business partners who know what is important to European importers.

Visit us in hall 3A, Booth 325 and in hall 3C, Booth 032!

At BIOFACH 2024, we introduce you to 52 reliable exporters of organic products from Burkina Faso, Colombia, Côte d'Ivoire, Ecuador, Egypt, Ethiopia, Ghana, Indonesia, Kenya, Madagascar, Morocco, Peru, Sri Lanka, Tunisia, and Ukraine.

On the following pages you will find detailed information about the IPD exporters. We establish direct contact to these suppliers and organise b2b meetings at the trade fair.

Our mediation is neutral, quality-conscious and free of charge.

IPD is an initiative of the Federation of German Wholesale, Foreign Trade and Services (BGA) and sequa, the development organization and partner of German business. We are funded by the Federal Ministry for Economic Cooperation and Development (BMZ) and part of the "Partners in Transformation – Business & Development Network", into which the BMZ programmes for economic actors are organised.

In line with our development policy objective, we aim to increase exports from partner countries, promote innovation and higher value creation in order to contribute towards sustainable economic development in partner countries.

IPD partners

IPD works with a network of international organisations in Europe and its partner countries.

Thus we efficiently pool information and know-how. Our partnerships enable us to tailor our services exactly to the needs of European importers.

FASO GLOBAL
FRUIT DRYING AND PROCESSING

Faso Global/AVLA

Hall 3A-325

Faso Global Import-Export (FGIE) is a Burkinabè company specializing in the processing of fruits and vegetables whose flagship product is mango. FGIE was created in 2017 with the aim of reducing mango rot and promoting the fruit and vegetable sector in Burkina Faso.

It is based in the province of KénéDougou, commune of Orodara located 75 km from Bobo Dioulasso and 432 km from Ouagadougou. The company plans to export over 100 tons of organic dried mango and 150 tons of cashew nuts in the coming years. This factory is HACCP, Fairtrade and Organic certified. Faso Global exports to Canada, The Netherlands and Tunisia.

Association – AVLA? Faso Global owns another association called “Association Vive L’Arboriculture” (AVLA). AVLA monitors 600 hectares of orchards and 190 mango farmers for traceability purposes. To ensure the quality of our products, all our farmers are BIO, Fairtrade, GLOBALG.A.P., and Tesco certified.

Products & quantities per year

- Dried mango / 100t
- Cashew nuts / 150 t

Certifications

- ORGANIC EU
- HACCP
- FAIRTRADE
- GLOBALG.A.P.

Source of raw material

- Their association of over 190 farmers on 600 ha

Royal Nature

Hall 3A-325

ABASF/E is an association that has been working to empower women and care for children in difficulty since 1995. The Royal Nature brand was born in 2003, with the aim of making these women financially independent and full players in the socio-economic development of Burkina Faso.

The company is owned by a woman and the 80 percent of the employees are women.

Royal Nature chose to enter to the dried mango process area because of the postharvest loss of fresh mango. On average 35% of mango spoils every year. The drying process is the best way to prolong the mango shelf life and to keep them tasty and healthy.

They have been processing dried mango for 20 years. The experience permits them to insure to our customers the best quality of dried mango. The company exports according to the buyer's specification and their bigger market is Europe.

They are continually investing in the factory in order to increase their capacity of production and maintain the quality of the product.

Products & quantities per year

- Dried mango bulk / 100t
- 100 g packaging: 3,500 pieces

Certifications

- ORGANIC EU
- HACCP

ADF-Agro

Visitor: available at 3A-325

ADF-Agro was founded in 2017 in Odienné in the north of Cote d'Ivoire with one main objective: the processing of raw agricultural produce in order to create substantial added value to our farmers' crops and provide employment opportunities for the rural population in our region. ADF-Agro originally started as a business exporting fresh fruits, but soon expanded the business into the production of dried. The company also aims at supporting women from the communities close to our production and to enhance their general status in life.

ADF-Agro assists in creating mango plantations, provides relevant knowledge like training for organic production and guarantees that the farmers' harvest enters the market. During the high season, ADF-Agro employs 150 workers. The company has exported fresh and dried mangoes Europe and USA and looks forward to meeting new potential clients to build sustainable business relationships.

Products & quantities per year

- Dried mangoes / 35 t to 50 t
- Fresh mangoes / 70 t to 100 t

Certifications

- ORGANIC EU
- GLOBALG.A.P.

Cayat

Visitor: available at 3A-325

In 2009, our founder Mr. Traoré Sinan, a cocoa producer himself, arrived in Yakassé-Attobrou discovering a reality where farmers are poorly remunerated and lead challenging lives. This inspired him to create the Yakassé-Attobrou Agricultural Cooperative (CAYAT) in October 2010, with the primary goal of ensuring a decent life for producers.

About 10 years later, the adventure of organic cocoa emerges during an awareness tour. In addition, CAYAT also embarked on an agroforestry cultivation project with selected organic certified members. Instead of just occasional contracts, we aspire to build strong relationships and lasting commitments. Behind our beans is the hard work of our producers and their dedication to nature-friendly agriculture. Every transaction we conclude is not merely a commercial deal, but an opportunity to turn the efforts our dedicated members into rewards and to shine the light of recognition on those who are often in the shadows.

Products & quantities per year

- Cocoa beans / 8,000 t

Certifications

EcoCajou, a newly established cashew processor (50-60 t/day) operating since October 2023 in Northern Côte d'Ivoire, specializes in the production of organic cashew kernels. With 90% ownership held by Ecookim, a cocoa smallholders' organization, created in 2004, it aspires to spearhead agricultural transformation in the Kabadougou region of Côte d'Ivoire.

Recognizing that unequal growth is inefficient and results in wasted human resources and missed opportunities for development and innovation, the company views their social policy as a business strategy. Consequently, by adopting a holistic, farmer-centered approach, they aim to drive positive changes within the communities engaged in the organic raw cashew nuts sourcing. Their business impact 12,746 small cashew producers (including 1,512 women, and 3,690 young people) within 460 communities. They are actively seeking partners who share a similar commitment to co-create a lasting and reliable narrative with the producing community, fostering a sustainable kernel economy.

Kany Scoops

Visitor: available at 3A-325

Kany is an initiative which supports women, to get a fair share of the income raised through cocoa grown on their family farms. Kany means “light” in the Akan language and its motto is bringing “women in the light” and 100% of Kany’s members are women. The cooperative was founded in 2016 in Séguié (eastern Ivory Coast) and has 25 employees and 500 certified farmers.

Kany is a flagship cocoa project for female empowerment, transparency, true traceability and ecology. The price paid for the cocoa beans as well as the premium are paid directly to the women through mobile money.

Kany improves cocoa quality through intensive monitoring of farms and also with a functional cocoa fermentation center equipped with a solar dryer with an annual capacity of 25 MT. Since 2020, Kany has been exporting its cocoa beans to demanding buyers in Switzerland.

Conexión Chocolate Ecuador

Hall 3A-325

Ecuador

Conexión Chocolate is an award-winning terroir-driven fine chocolate company committed to crafting incredible chocolate in the country of origin, sourced directly from small scale cacao growers using traceable and organic agroforestry practices.

Nacional Cacao is a heirloom variety native of Ecuador considered one of the best fine flavor cacaos in the world and it is in danger of extinction. Conexión Chocolate works directly with cacao cooperatives to preserve its cacao, empowering communities and inspiring new generations. The company connects the world with the country's soul and boosts their customers creations providing unforgettable experiences.

Conexión Chocolate uses a variety of roasting profiles to highlight the innate organoleptic flavor profiles from different regions of Ecuador to bring single-origin artisan chocolate to life. It is sold in Asia, US and Europe.

Kuná Chocolate

Visitor: available at 3A-325

Ecuador

Kuná is about sharing what chocolate and the place where cacao grows represents. Traceability and purity are top priorities for the company.

Since 2012, Kuná Chocolate/Freshcosta works in partnership with farmers cooperatives in different Ecuadorian regions. Through the cultivation of “Nacional” cacao, the company aims at supporting families in getting access to greater development opportunities while respecting the existing life forms on their farms and land.

In 2015, an own cultivation site was set up in their farm at Los Rios. Right in the middle of their own cacao plantation, beans are fermented and sun dried. Afterwards, beans are transformed into craft chocolate according to the needs of their customers in a fully allergenic-free facility.

Kuná Chocolate/Freshcosta has now nine years of export experience. Its trustable and eco-friendly products are used in 12 countries around the world.

Products & quantities per year

- Cocoa beans / 40 t
- Cocoa nibs / 30 t
- Cocoa mass / paste / 45 t
- Chocolate cobertura / 30 t
- Chocolate bars / 11 t
- Cocoa butter / 12 t
- Cocoa powder / 12 t

Alrehab Herbs

Hall 3A-325

Egypt

Established since 1996 within the Egyptian market and since 2012 on the international stage, Al RehabHerbs is a dedicated specialist in medicinal and aromatic plants sourced from Egypt. Their distinction lies in a robust and well-established supply chain that sets them apart.

Alrehab Herbs approach encompasses the complete spectrum: cultivation adhering to GAP and GHP standards, drying techniques encompassing both sun and advanced machine drying, processing that aligns with GMP guidelines, and packaging crafted from fresh fibers to mitigate MOSH/MOAH concerns.

They predominantly serve key markets including Europe, the USA, and the Gulf region. Their credentials encompass prestigious certifications such as ORGANIC (EU, NOP), FSSC 22000, KOSHER, and Sedex, underlining the commitment to quality and ethical practices.

Products & quantities per year

- Chamomille / 150 t
- Mint / 100 t
- Basil / 100 t
- Marjoram / 100 t

Bio Oasis is a family business. The journey started in 1988 when founder Prof. Dr. Hamdy Seif El-Nasr was reclaiming his farm in the desert area and was converting it into an organic farm.

Bio Oasis adapted its own system for small farmers (collective farm system) and is one of the few Fairtrade certified companies in Egypt.

Bio Oasis focuses on delivering highest quality to its customer world wide and providing a reliable and sustainable service. Its success is achieved through well-trained quality assurance staff, working on the farm and processing facilities.

Novaroma

Hall 3A-325

Novaroma is a food processing company with its production facility in Beni Suef, Egypt. They provide an alternative to the few other origins for their products and enjoy an amicable relationship with European importers with competitive pricing and high-quality materials.

Novaroma is a vertically integrated organization that handles crop cultivation, harvesting and operates a fully equipped dehydration and processing facility in an effort to keep all work done in-house. The finished product is packed in retail, food service or bulk format. Egypt also benefits from its ideal geographic location for quick and cost-effective transportation by sea to all EU ports.

The company is constantly pursuing higher standards, reflected by 3rd party audits and facility upgrades.

Products & quantities per year

- Dehydrated vegetables (jalapeno, chili, carrot, spinach, green onion, paprika, etc.) / 300t
- Dehydrated herbs (basil, mint, parsley, marjoram, oregano, etc.) / 1,000t

Beza Mar Agro-Industry

Hall 3A-325

Beza Mar Agro-Industry is a pioneer organization in the apiculture subsector. The company was established in 2003 with the aim of collecting, processing and supplying the untapped apicultural resources of Ethiopia for both the local and export markets.

Beza Mar is established as a private limited company owning two modern honey processing plants. The company has been engaging in the production of table honey and beeswax since 2008 and has gradually started to export honey and beeswax to the international market.

After the EU accreditation of Ethiopia under the third country listing, Beza Mar became the first private company to supply organic semi-processed honey and beeswax to the UK market. Since then, the company obtained exposure to foreign markets and became registered as an exporting company of honey and beeswax. Furthermore, Beza Mar expanded its market to other EU countries, Middle East, Japan and USA.

Products & quantities per year

- Honey / 400 t
- Beeswax / 200 t

Certifications

- ORGANIC (EU, NOP)
- ISO 22000

Coastal Groves

Hall 3A-325

Coastal Groves is a producer and processor of organic citrus products. It was founded in 1994 to share the wonderful natural citrus products of Ghana with the world, and to provide poor Ghanaian citrus farmers access to global markets, and better livelihoods as a result.

All ingredients are organically grown in Ghana's citrus belt, a 200km region in the central region of Ghana.

Coastal Groves has two main business lines: the juice business line which produces organic orange juice, and the peels business line which produces organic orange and lemon peels.

Products & quantities per year

Jassa Organics

Visitor: available at 3A-325

Ghana

Jassa Organics was set up in 2023 by a female entrepreneur with a passion for medicinal and aromatic plants.

As a responsible Ghanaian business, Jassa Organics is committed to putting back more than it takes out of the planet. This commitment starts with paying both farmers and workers a fair price for their services and raw materials.

What differentiates Jassa Organics from the competition is the company's commitment to quality.

For 2024, they have expanded the range of products to include wild collection, organic certified Griffonia seeds (*Griffonia simplicifolia*).

Wad African Foods

Visitor: available at 3A-325

Ghana

Wad African Foods was created in the year 2000 with the aim of supporting small-scale farmers by organising them and adding value by processing their produce into dried fruits for export.

The knowledge of farmers and their individual harvesting by hand allows them to select only mature well-ripened fruits. This coupled with all the steps in Wad African Foods' processing – peeling, cutting, and packaging done manually, contributes to more accurate checks allowing Wad African Foods to offer its customers high-quality products.

The company currently exports to Switzerland, Germany, Japan and the USA.

Products & quantities per year

- Pineapple dried / 8 t
- Mango dried / 5 t
- Coconut dried / 40 t
- Papaya dried / 3 t

Adore Rempah

Hall 3A-310

Adore Rempah Indonesia is a vanilla producer located in the heart of the vanilla farms on Sulawesi Island. Committed to sustainability and inclusivity, Adore has direct access to impose high-quality raw material selections, while its farmers benefit from improved welfare.

Complemented by standardized curing methods, Adore ensures consistent production of remarkable vanillin-rich vanilla, achieving up to 3.8% vanillin content (for its crystallized/frosted vanilla beans) with an average of 2%. Adore solves the low-quality vanilla problem in the market (where most vanilla barely reaches 1.3%), providing its customers with peace of mind through a vanillin content guarantee.

Adore's vanilla has been distributed to some world's famous pastry chefs, stores, and extraction companies, reflecting exceptional quality.

Products & quantities per year

Berkat Petani (Gulapa)

Hall 3A-310

Berkat Petani Indonesia (Gulapa) is a manufacturer of high-quality coconut sugar. The company name comes from their mission to be a blessing and increase the life standard of local farmers in Central Java by partnering up with them and giving back to society.

Coconut sugar is produced by collecting the sap from the flower bud of the coconut palm tree. Not only is it a healthier alternative, but it is also a more sustainable option, as coconut palms are a renewable resource that requires minimal inputs and can be grown in diverse agroforestry systems. In Indonesia, coconut sugar has been used for centuries as a traditional sweetener.

Gulapa's role is to support and maximize the local community by working together with Non-Governmental Organization as they strive to improve the prosperity of the local community

Hugo Inovasi

Hall 3A-310

Hugo Inovasi is manufacturer and exporter of coconut sugar. The company is located in the Central Java, Banyumas, the heart of coconut sugar farmers and plantations. The company processes sugar directly from farmers in its own facility, serving as a guarantee for a short supply chain and complete traceability.

Hugo's coconut sugar carries industry standard certification seals. It is therefore made by applying biological and mechanical practices that support ecological balance, on-farm cycling of resources, and the conservation of biodiversity.

Hugo Inovasi is growing together with farmers to live to their fullest potential. They are not only making profit, but also benefit.

Products & quantities per year

- Coconut sugar / 800-1,000 t
- Coconut syrup / 140-200 t

Avopro

Hall 3A-325

Avopro is located in Sagana, right in the heart of the highly fertile and productive agricultural zone of the Mt. Kenya region. The volcanic soils in this expansive zone coupled with a favorable climate offer great conditions for growing avocados. Over 80% of Avopro's raw material is sourced from hundreds of small-scale farmers registered in their organic and Fair for Life program. The farmers use intercropping techniques that help protect the soil from degradation as is often found in monocultures.

Avopro's cold pressed avocado oil is produced according to their food safety management system benchmarked to the ISO 22000 standard. The Avopro team considers themselves sticklers for integrity, teamwork, and are relentless in their pursuit for quality and customer satisfaction.

Products & quantities per year

- Crude avocado oil / 660 t
- Extra virgin avocado oil / 220 t

MG Sakay

Hall 3A-522

MG Sakay is a Madagascan company that produces 100% natural essential oils, with full respect for the environment.

For more than 20 years, the company has been cultivating its own land, which allows for better control, product traceability and quality assurance. Apart from the local market, they export their products to the European market. It's important to them, that their customers know the origin of the products, how they are produced and that they can have complete confidence in the products they consume.

MG Sakay supports more than a hundred farming families who are able to provide education for their children and food for their families. They help develop local communities and reforest every year to protect the environment.

Coopérative Femmes Dades

Vivanness: Hall 3C-032

Morocco

Femmes Dades is a women's cooperative specialized in the production and commercialisation of organic Damascina roses. They offer the fresh smell of south-east Moroccan oasis, throughout a wide range of high-quality organic products, such as dried rose, rose water, rose oil, and certain cosmetic products based on the rose, like cream, Moroccan ghassoul and soap.

The main purpose of the cooperative is to valorize and market the production of rural women to enhance their livelihoods through the production and sale of rose products. To achieve this target, the cooperative trains its members on organic production and the good agricultural practices to ensure a sustainable production that respects the environment of the oasis. The cooperative currently exports to Belgium, France, Germany and Switzerland and aims at increasing its exports across Europe.

Dar Tomoor

Hall 3A-325

Dar Tomoor is a family business inspired by long-lasting traditions. The farm base was established 14 years ago in the Ferkla region, near Errachidia in Morocco – a 23 hectares lot where the orchards of palm trees are now thriving. The company's mission is to make organic Mejhoul and Boufeggous dates accessible to all and to promote a healthy lifestyle by educating consumers on the benefits of dates.

Dar Tomoor dates are grown with care in order to deliver the highest-quality products. Dar Tomoor's commitment to the environment is crucial. Some of the actions taken are powering the land with solar energy to reduce carbon emissions, recycling organic farm waste as compost, and delivering zero phytosanitary products.

Dar Tomoor is currently operating in Morocco, which has been a great success. The next step is to enter the European market and supply Dar Tomoor's unique products internationally.

Products & quantities per year

- Mejhoul dates / 120 t
- Boufeggous dates / 110 t

Certifications

Domaine Irzane & Victoria Esperance

Vivanness: Hall 3C-032

Morocco

Domaine Irzane & Victoria Esperance specializes in the cultivation and processing of saffron. Located at an altitude of 1,500m in the Middle-Atlas region in Morocco, their farms offer the ideal weather conditions for the growth of a higher quality saffron. Moreover, their fields remained fallow for decades giving them an invaluable advantage for their certified organic culture. Domaine Irzane & Victoria has a modern processing site ideally located near their farm. They highly value their impact on the environment and have solar panels to power their processing. The company also uses drip irrigation to ensure an efficient water usage.

The company also values its roles in the local community and provides its employees with fair working conditions. Thanks to its characteristics, their organic saffron is categorized as category I according to the ISO 3632 Standard. The company aims to export its saffron to Europe and the world.

The Tighanimine forestry cooperative is a women cooperative located in the southern region of Morocco, 12 km from Agadir renowned for its argan production. It was established in 2006 under the initiative of Mrs. Nadia Fatmi, with the aim of improving the situation of rural women by adding value to their ancestral know-how of argan oil production and exporting it to the world.

Currently the cooperative has 50 members. It specializes in the production, marketing, and export of argan oil (cosmetic & culinary) and other derivatives of the argan fruit. The cooperative values its social impact in the community and offers its members a fair and decent source of income. That argan fruits are harvested in line.

Owning and controlling the complete process allows the cooperative to guarantee the quality of its products while preserving the environment through sustainable production. Tighanimine has been exporting its production to different European countries including Belgium and Germany and is aiming at further expanding its exports in Europe.

Andean Roots

Hall 3A-325

Andean Roots is an agroindustry that produces, processes and markets organic and functional superfoods from Peruvian biodiversity. It was founded in June 2007 in the Peruvian Highlands. The company's farm is located close to its processing plant, which allows for quick processing of the products, resulting in high quality and cost efficiency.

Andean Roots works with 20 farming families in the region to grow and harvest yacon and goldenberries, which are then processed and marketed. In the processing of its products, the company specializes in vacuum concentration and continuous dehydration. This allows to preserve the physical, chemical and organoleptic characteristics of the raw material.

Ellawala Horticulture

Hall 3A-105

Ellawala Horticulture, founded in 1992, is a pioneer in Sri Lankan agriculture. The Tom EJC mango variety was introduced by Ellawala and received formal recognition from the Department of Agriculture in 2003 and is now the variety of choice for cultivation in the dry and intermediate zones of Sri Lanka.

In 2017, the company began exporting organic fresh mango and other fruit varieties to several countries worldwide. In 2021 Ellawala commissioned a modern food production facility located within its extensive farm in the Sri Lankan North Central Province. With five production lines, including pulping, canning, cooking, freezing, and dehydrating, Ellawala can produce a wide range of tropical fruit products that are full of natural goodness made from tree ripened and handpicked fruits that are grown in their organic farms.

Ellawala has 150 employees, of which 70% are women from the villages around the factory.

Products & quantities per year

Serendipol

Hall 3A-105

Serendipol is the only company in the world that has received the Regenerative Organic Certified® certification for coconut production. This certification is the highest global standard for responsible businesses, surpassing both Organic and Fair-Trade standards by taking soil health, animal welfare, and social fairness into account. What makes them stand out is their collective goal to positively impact the lives of their community by providing access to healthcare, education, and rural infrastructure.

They aim to become the preferred ingredient brand partner for socially conscious brands, and their commitment is strongly supported by customers who view them as a benchmark for managing their value chain to the highest standards. Working in collaboration with almost 1,000 farmers, Serendipol processes over 30 million coconuts annually, producing a range of products including virgin coconut oil, coconut milk, coconut cream, coconut flour, coconut flakes, chips, and coconut water. Ensuring that no part of the coconut goes to waste, the husks are sold and processed into fibre for ropes, doormats, and erosion control; the shells are burned to provide biomass energy or sold to produce charcoal and activated carbon, and the seed cake is used for animal feed. Serendipol consistently embodies the principles of reduction, reuse, recycling, and regeneration in daily life.

Products & quantities per year

Mol'Far is a young Ukrainian eco-brand founded in 2016. Their main product is fermented willow herb tea, and in addition also herbs, berries and fruits.

Mol'Far tea production is located in the ecologically clean region of the Ukrainian Carpathians – the village of Izky, Khust district, Transcarpathian region. All the ingredients, herbs and berries are collected there.

The entire production chain of Mol'Far holds an organic certificate according to the European standard. The Mol'Far company added dried porcini mushrooms and berries to its product range and plans to further expand and develop as an eco-brand in the future.

In October 2022, the first export delivery of Mol'Far tea to Germany took place.

Products & quantities per year

- Willow herb (*Epilobium hirsutum*)
tea fermented / 1 t
- Linden (*Tilia cordata*) flowers, dried / 2 t
- Mint (*Mentha piperita*) dried / 5 t
- Melissa (*Melissa officinalis*) dried / 5 t
- Porcini (*Boletus edulis*), slices,
powder / 1 t

Certifications

- ORGANIC EU

Source of raw material

Oril-Eco

Hall 3A-325

Driven by the love for their native land, Oril-Eco company was founded in 2018. The company grows strawberries (13ha) and raspberries (23ha) in the Tsarichansky district of the Dnepropetrovsk region, Ukraine.

Since 2019, the company has launched its own freezing complex – with the entire production being certified according to the FSSC 22000 standard.

In 2022, despite the difficult situation in the country, Oril-Eco consolidated efforts with Dykanski Yagody, also a producer of frozen berries & initiator of sublimating frozen produce. Today, both partners produce freeze-dried berries under the trademark “Panfruit”. Three freeze-driers with each 100kg capacity for frozen raw material started working in July 2022 under this collaboration.

Products & quantities per year

- Raspberries frozen / 100 t
- Strawberries frozen / 130 t
- Raspberries freeze-dried
- Strawberries freeze-dried
- Peaches freeze-dried
- Blueberries freeze-dried

Certifications

Deutsche Gesellschaft für internationale Zusammenarbeit (GIZ) GmbH

Hall 3A, Booth 3A-325

At BIOFACH 2024, GIZ provides an overview of its engagement in organic agriculture.

Our joint stand presents partner companies, organic project experiences and possibilities for future cooperation with the private sector.

GIZ is a global service provider in the field of international cooperation for sustainable development with over 50 years of experience. As a federally owned enterprise, it supports the German government, in particular the Federal Ministry for Economic Cooperation and Development (BMZ) and other clients, in around 120 countries in achieving their development objectives.

GIZ works with its partners to develop effective solutions that sustainably improve the living conditions of people in our partner countries. We help identify the potentials of individuals and/or businesses and provide local and sustainable support to turn opportunities into successes, in regional, national and international markets.

Within the framework of the special initiative "Transformation of Agriculture and Food Systems", BMZ contributes to the BIOFACH each year by inviting carefully selected partner companies. On the Ministry's behalf, GIZ and the Import Promotion Desk (IPD) jointly organize a stand where the companies can present their products and matchmake with new business partners.

Since 2015, GIZ and IPD are collaborating to co-create a space for companies from BMZ's partner countries to have better access to the globally leading organic fair, receive guidance before and during the fair, and most importantly, to make new business connections and agreements in Europe.

The overall goal is connecting exporters, however small or big they might be, with importers in the European markets and establish sustainable trade relationships that help improve the lives and communities in our partner countries.

Greenkera

Hall 3A-325

Greenkera is a distinguished spice and coffee enterprise hailing from Kerala, India. It established in 2019 and is committed to offering a diverse range of organic products accessible nationwide. Their portfolio includes organic spices, coffee, and cocoa. They take great pride in sourcing fresh raw materials directly from the farmers in the high-range of Idukki, Kerala. These products are cultivated organically and naturally. After harvesting and post-harvest drying, the materials are collected directly from farmers' gates and then carefully processed in Greenkera's HACCP-certified facilities.

The processing involves crucial steps: cleaning, washing, grading, colour sorting, pulverizing, packing, and timely delivery to their customers. Greenkera is dedicated to sustainability and quality, which is reinforced by our European and Indian certifications, ensuring our spices meet the highest standards.

Discover the authentic flavours and tempting aromas of Kerala through Greenkera.

Jaivik Avam Prakrutik

Hall 3A-325

JAP-PCL was created as a multi-state farmers' producer company, started by shareholder-member farmers from Indian states of Karnataka, Tamil Nadu, Kerala and Andhra Pradesh.

All these farmers practice only organic farming or natural farming, and hence the names, Jaivik (organic) and Prakrutik (natural). The farmers are certified organic since 2015. JAP gives a wider basket of offerings for organic products to markets and buyers.

Currently, JAP is representing 1,751 certified organic farmers.

Products & quantities per year

- Red chilli (SHU 20K - 30 K) / 300 t
- Turmeric (3%-4.5%) / 250 t
- Black pepper (500-530 g) / 50 t
- Cashew nuts / 100 t
- Millets (Pearl, Kodo, Proso, Foxtail, Little, Barnyard) / 240 t

Kadamba Marketing Souharda Sahakari Niyamita

Hall 3A-325

Established in 2005, Kadamba Marketing Souharda Sahakari Niyamita (KMSSN) is a cooperative society dedicated to enriching Uttara Kannada District's economic and natural wealth in Karnataka, India, through unwavering commitment to organic farming.

Their goal is to empower farmers in the region by establishing an equitable, transparent market for diverse organic crops like black pepper, turmeric, clove, cinnamon, cashew, cocoa, paddy, coconut, jackfruit, garcinia, and more. Guided by co-operation, transparency, and sustainability, their vision is to be a leading cooperative society, providing a platform where organic farmers connect with conscious consumers and businesses.

Objectives include fair markets, empowering farmers, fostering sustainable organic agriculture, promoting cooperation, supporting local development, and ensuring transparency. Through ongoing innovation and dedication to social responsibility, their aim is to cultivate a flourishing organic agricultural ecosystem, benefiting farmers, consumers, and the environment.

Products & quantities per year

- Black pepper / 20 t
- Ginger / 5t

The One Gujarat Organic Farm Producer

Hall 3A-325

The One Gujarat Organic Farm Producer works under the registered trademark brand "Or-Farm". Connecting small and marginal organic farmers with around 45 women farmers (two of them are members of the board of directors) from each corner of Gujarat and serving consumers across the nation is in the genesis.

The Farmer Producer Organisation (FPO) is managed by stakeholders of agriculture i.e. Certified Organic farmers of Gujarat. Team One Gujarat unites many proven and established farmers in the team and thus aims at becoming a guide to many farmers collectively.

The One Gujarat Organic Farm Producer is member of the intercontinental network of organic farmers organisations (INOFO), which supports the participation at Biofach 2024.

Products & quantities per year

- Spices & seed spices (turmeric, ginger, red chili, cumin, mustard, coriander, sesame, etc.) / 50 t
- Organic grains / 50 t
- Pulses / 50 t
- Millets / 30 t

Certifications

- ORGANIC NOP

Source of raw material

- Small-scale farmers from Gujarat

Baobab Products Mozambique

Vivanness: Hall 3C-032

Mozambique

Baobab Products Mozambique (BPM), established in 2015, is based in Chimoio, Manica Province in central Mozambique. BPM is an inclusive business, with 20% of shares in the company committed to the association representing the 3,000+ women baobab harvesters from whom BPM buys fruit. BPM is committed to sustainable harvesting and natural resource management and imposes strict quality controls at all stages of production, including rigorous testing of samples.

BPM is a growing business: since 2016, BPM has become one of the biggest suppliers of high-quality organic baobab powder in Africa. BPM supplies natural product distributors and food manufacturers in Europe and the UK and has a growing national market. In 2022, BPM added organic certified oil to its product range.

Products & quantities per year

- Baobab fruit pulp / 60–80 t
- Baobab seed oil / 3 t

Certifications

- ORGANIC EU
- HACCP
- HALAL

Source of raw material

- Wild collection
