Sourcing for development

Discover new sources of natural ingredients
for the European market!

Meet trusted suppliers at SIAL 2026. Visit the joint stand of the Import Promotion Desk (IPD) and Open Trade Gate Sweden (OTGS). Under the motto **"Sourcing for development"**, we connect European buyers and carefully vetted suppliers from developing and emerging countries.

Explore a diverse portfolio of high-quality natural ingredients, meet reliable export-ready companies, and establish valuable long-term business partnerships.

At **SIAL 2026**, we are showcasing more than 50 innovative companies from **18 partner countries**, offering their diverse range of natural ingredients for foods, pharmaceuticals or cosmetics. Our suppliers bring a wide variety of over 250 products to Paris.

Import Promotion Desk (IPD)

IPD is the German initiative for import promotion. Through market-oriented training, individual coaching and participation in leading international trade fairs, IPD connects German and European importers with carefully vetted suppliers from developing and emerging countries. Every company in our programme undergoes a rigorous, multi-step screening process. This includes on-site evaluations by experts regarding product quality, export readiness, and compliance with international standards.

Partners in
Transformation
Import Promotion Desk

Our contact brokering is neutral and free of charge.

IPD is an initiative of the Federation of German Wholesale, Foreign Trade and Services (BGA) and sequa, the development organisation and partner of German business. IPD is funded by the Federal Ministry for Economic Cooperation and Development (BMZ).

More information about IPD: www.importpromotiondesk.de

Open Trade Gate Sweden (OTGS)

OTGS is part of the National Board of Trade Sweden and supports companies in low- and middle-income countries in accessing the Swedish and the European market. Through capacity-building, market guidance and matchmaking activities, OTGS helps exporters to meet European requirements and to develop sustainable business relationships.

At SIAL 2026, OTGS presents selected suppliers from its partner countries Armenia, Colombia, Guatemala, Moldova and Ukraine, offering high-quality products and proven export experience.

IPD partners

IPD works with a network of international organisations in Europe and its partner countries.

Thus we efficiently pool information and know-how. This enables us to link existing import and export promotion measures and carry out their strategic further development. Our partnerships always make it possible for us to match all services of IPD to the needs of importers and exporters exactly and then carry out our services optimally at any place.

Darman Herbal Products is an Armenian specialty herbal company dedicated to creating premium, caffeine-free herbal infusions from carefully selected mountain herbs sustainably harvested in the pristine highlands of Tavush. Combining traditional herbal knowledge with innovative product development, Darman has introduced its patented Whole Plant Infusion concept, allowing consumers to experience the beauty, aroma, and authenticity of the entire herb in every cup. This distinctive innovation has attracted strong interest from European partners and established successful international collaborations.

Darman's products stand out for their exceptional quality, natural origin, aesthetic presentation, and unique sensory experience, offering consumers a refined and memorable herbal ritual.

Terramazonia Superplants is an Amazon-based food innovation company founded in 2014 in Manaus, Brazil. They transform the Amazon rainforest's rich biodiversity into high-value natural ingredients and functional superfoods through science, technology, and sustainable sourcing. The portfolio includes açai, camu-camu and guaraná powder, Brazil nut ingredients, plant-based proteins, and functional blends for the food, nutraceutical, and health markets, and customized ingredients for industrial applications.

Working closely with local producers and community-based supply chains, they ensure quality, traceability, and responsible sourcing while supporting the sustainable development of the Amazon region. Through innovative processing technologies, they preserve the nutritional and functional properties of Amazonian ingredients, delivering premium solutions for healthy and natural products.

Fair Farms

supported by GIZ
Hall 7 | Booth J-347

Fair Farms is an organic and Fair Trade Kampot pepper producer and processor, founded in 2014 in the Kep-Kampot region. The company produces and exports premium PGI kampot pepper and Tahitian vanilla to European markets. Processing takes place on the farm using a combination of mechanical and manual methods, ensuring full quality control from harvest to final packaging. Products are packed in 20 kg export boxes and shipped by container, with flexible Incoterms and full export licensing available. Every order includes complete upstream and downstream traceability, making Fair Farms a valuable ESG reporting partner for importers.

Endorsed by UNDP, GIZ and Oxfam and recognized multiple times for its positive impact on people and the planet, Fair Farms is a trusted, impact-driven partner for buyers seeking authenticity, compliance-ready supply chains and genuine sustainability credentials.

Handcrafted Cashew Nuts Stung Treng

Hall 7 | Booth J-347

Cambodia

Handcrafted Cashew Nuts Stung Treng (HCST) is a women-founded social enterprise established in 2021 in Stung Treng Province, northeastern Cambodia. Working closely with local farmers, HCST has built a responsible and transparent cashew value chain that promotes sustainable agricultural practices, environmental stewardship, and inclusive economic opportunities. Committed to protecting local ecosystems and fostering fair, long-term partnerships with farming communities, HCST creates value at origin while supporting rural livelihoods. The company's careful processing methods preserve the natural quality, rich flavor, and satisfying crunch of its premium cashews.

Choosing HCST cashews means enjoying a delicious snack while supporting a business that creates positive social and environmental impact for people, communities, and the natural environment.

Products & quantities per year

- Processed cashew kernels (WW160, WW180, WW210, WW240) / 900 t

Hesed is a Cambodia-based company dedicated to ethical, sustainable agriculture and fair trade. The company partners directly with smallholder farmers to produce premium Palmyra Blossom Sugar, a rare natural sweetener harvested from wild-growing palmyra palm trees (*Borassus flabellifer*), Cambodia's national tree. Certified with EU Protected Geographical Indication (PGI), the sugar is minimally processed to preserve its natural nutrients and distinctive light caramel sweetness with subtle umami.

Hesed also offers naturally dried mangoes, dragon fruits, premium cashew nuts, and Kampot pepper, all produced without additives and rooted in Cambodia's rich biodiversity. As a guaranteed WFTO member, Hesed ensures full traceability, fair pricing, and meaningful social impact by supporting women, smallholder farmers, and rural communities.

Delight Cane bridges the gap between traditional Colombian craftsmanship and the global food industry's demand for natural, high-quality ingredients. As a women-led organization, the company focuses on transforming the organic sugar cane supply chain, connecting smallholder farmers with international markets through a value chain built on social impact, radical transparency, and sustainability. By treating panela sugar cane as a premium, nutrient-rich functional ingredient, Delight Cane offers a clean-label solution for the modern food landscape. The company combines deep ancestral knowledge of panela production with professional processing standards, ensuring consistent, high-quality ingredients that help food manufacturers differentiate their products while supporting rural development.

Founded in 2023 in Grand-Bassam, Côte d'Ivoire, GFA is an agro-industrial company specialized in processing and freezing fruits and vegetables. Their mission is to deliver high-quality frozen products that meet strict food safety standards while respecting the environment. Committed to quality and food safety, GFA has achieved FSSC Development Program - Level 2 certification, aligned with HACCP principles and the FSSC 22000 framework.

Today, GFA serves the Ivorian market through strategic partnerships with Auchan, Carrefour, TotalEnergies, KFC, and TBC Catering, while expanding exports, particularly to Europe. To support growth and rising demand, GFA has established a strategic partnership with MAPACI, a leading player in Côte d'Ivoire's agri-food sector, enhancing production capacity, supply chain reliability, and export development.

Alibú

Hall 5A | Booth H-126

Alibú is an Ecuadorian family business dedicated to transforming tropical fruit into innovative ready-to-use beverage and food solutions. Through fruit dehydration, the company creates convenient and flavorful products that eliminate seasonality, reduce waste, and deliver premium differentiated experiences for brands and consumers. Inspired by Ecuador's biodiversity, Alibú works closely with local producers to support responsible sourcing and generate value for rural communities. Their mission is to bring natural, practical, and original fruit based solutions to international markets through quality, creativity, and sustainability.

Their dehydrated fruits and herbs are ideal for infusions, snacking, or other food applications. They are available as curated blends - featuring unique recipes from Alibú and tailored to customer needs - or as single-ingredients for the food industry.

Wiñak is an association of small-scale Kichwa producers in Napo, Ecuador, dedicated to the production and marketing of sustainable Amazonian products such as fine-aroma cacao and guayusa. Its model is based on the 'chakra', an ancestral agroforestry system that preserves biodiversity and avoids the use of agrochemicals, thereby protecting the Amazon ecosystem. The organization's central focus is fair trade and value addition, enabling farming families to actively participate in the export chain and improve their quality of life.

Wiñak combines tradition and technology to meet international organic standards, strengthening community governance and demonstrating that economic sustainability and cultural preservation are fundamental pillars for rural development in the Amazon region.

Products & quantities per year

Fundación Chankuap

supported by GIZ
Hall 5A | Booth H-126

The Fundación Chankuap Recursos para el Futuro is a non-profit organization with a Salesian approach that works alongside indigenous communities in the Ecuadorian Amazon, primarily the Achuar and Shuar peoples. Its mission is to promote sustainable development by strengthening productive capacities, ensuring the responsible management of natural resources, and generating decent incomes. It promotes organic production, the processing of value-added products, and their marketing in national and international markets under fair trade principles. Additionally, it fosters community organization, respect for ancestral culture, and the conservation of the Amazonian environment, thereby contributing to improving the quality of life for families.

A key differentiating factor of the foundation is its close, long-term social engagement with indigenous communities, combined with the high quality.

Healthyamazon is a company founded in 2018 and located in Archidona, Ecuador, in the heart of the Ecuadorian Amazon. It is dedicated to the production and marketing of organic and natural products derived from Amazonian biodiversity, primarily guayusa - the sacred leaf traditionally used to prepare an energizing infusion.

Healthyamazon operates with a focus on quality, sustainability, and respect for the environment, promoting responsible practices from the selection of raw materials through processing and marketing, while collaborating with indigenous producers in the region, including organic farmers. Its value proposition is based on offering authentic products of Amazonian origin, with high quality standards and a commitment to sustainable practices that create value for customers and communities.

Kallari

supported by GIZ
Hall 5A | Booth H-126

Kallari is a community-based cooperative founded in 2003, bringing together around 850 indigenous Kichwa families in the Napo province of Ecuador. Its business model stands out for managing the entire value chain, from cultivation to the marketing of high-quality chocolate and handicrafts.

At the core of its production lies the "chakra", a traditional agroforestry system that preserves Amazonian biodiversity and prevents monoculture practices. Through the export of fine-flavor cocoa and value-added products, Kallari aims to ensure fair prices for local producers, reduce poverty, and curb deforestation.

Nunalabs

supported by GIZ
Hall 5A | Booth H-126

Nunalabs is an Ecuador-based innovator transforming biodiversity into high-value botanical extracts for the global food, beverage, and nutraceutical industries. Working directly with local communities and agroforestry systems, the company develops functional ingredients that combine traditional plant knowledge with modern extraction technologies. Their proprietary blends bring together carefully selected herbal extracts, designed to work in synergy for effective, natural solutions. Their approach focuses on traceable supply chains, sustainable sourcing, and the creation of differentiated ingredients that help brands respond to the growing demand for natural functionality.

Berkat Petani Indonesia (Gulapa) produces high-quality coconut sugar while supporting smallholder farmers in Central Java. The name "Gulapa" reflects the company's mission: to be a blessing and improve farmers' livelihoods by building strong partnerships and giving back to society. Coconut sugar is made by collecting the sap of coconut palm flower buds – a traditional sweetener in Indonesia and a sustainable alternative to refined sugar. Coconut palms thrive in low-input, diverse agroforestry systems, making this sweetener both eco-friendly and renewable.

Gulapa works closely with NGOs to empower local communities and promote sustainable agriculture, striving to raise living standards through ethical production and inclusive business practices.

Milly Fruits Processors

Hall 5A | Booth H-126

Milly Fruits Processors was established in 1988 in Mtwapa on the Kenyan coast. The company specializes in processing high-quality tropical fruits into fruit pulps, juices, concentrates, and dehydrated fruits for regional and international markets. The raw materials are sourced from more than 2,000 smallholder farmers in Kilifi County, Kenya, complemented by the own farm. The company maintains strict food safety standards and ensures full traceability through an app-based farm-to-fork system. Milly Fruits Processors is committed to sustainable sourcing and works closely with farming communities through training programmes and fair trade partnerships.

To further strengthen its export capabilities, the company recently commissioned a new 400-ton fruit dehydration facility in Malindi (Kenya), equipped with modern processing technology.

Products & quantities per year

Vokenel

Hall 5A | Booth H-126

Vokenel Enterprises is a Kenyan company that processes and sells natural baobab fruit powder and baobab oil. Baobab fruit powder is a nutritious superfood, while baobab oil is valued in cosmetics for nourishing skin and hair. The company sources baobab fruits from Makueni, Kenya, where the powder is processed and the oil cold-pressed. The baobab tree is one of the most iconic and indigenous trees from Africa and it is also referred to as the “Tree of Life” due to its numerous benefits.

Vokenel works with over 100 farmers, mostly women, in the semi-arid Makueni area. Purchasing their products directly supports rural communities by enabling farmers and processors to earn income, improve livelihoods, access healthcare, and educate children. Their model also contributes to conserving baobab trees, since farmers gain incentives to preserve them by sustainably harvesting and selling fruits.

Products & quantities per year

- Baobab fruit powder / 120 t
- Baobab oil / 12 t

Coopérative Femmes Dades

IPD alumni

Hall 3 | Country Pavilion Morocco

Femmes Dades is a pioneering women-led cooperative from Morocco's renowned Dadès Valley, home to a centuries-old tradition of Damask rose cultivation. Benefiting from the valley's unique mountain climate, fertile soils, and abundant sunshine, the cooperative transforms these precious roses into premium products, including rose essential oil, rose water, and dried rose petals.

Founded by rural women farmers, Femmes Dades blends tradition with innovation, combining heritage, quality, and fair-trade values to bring the authentic essence of Morocco's Valley of Roses to markets around the world. Through its work, the cooperative creates sustainable opportunities for rural women, strengthens their economic empowerment, and helps preserve the region's unique cultural and botanical heritage.

Chavin Dried is a Peruvian company specialized in the production and export of high-quality dried fruit. They operate their own production facilities, which allows them to maintain full control over each stage of the process – from the selection of raw materials to the final packaging. Their commitment to excellence is reflected in their strict quality standards, which have allowed them to obtain multiple international certifications. By using cutting-edge technology, they ensure efficient processing and deliver natural, healthy, and sustainable products.

Chavin Dried strives to bring the best of Peru to the world, with a strong focus on flavour, nutrition, innovation, and social responsibility.

Frozen Brands

Hall 5A | Booth H-126

Frozen Brands is a leading manufacturer and distributor of high-quality, nutritious, and convenient frozen fruit products. All products are 100% natural and frozen at peak ripeness to preserve taste, texture and nutritional value. Freezing fruit helps reduce waste while retaining the same nutritional benefits as fresh fruit.

Frozen Brands is committed to supporting and uplifting local communities by primarily employing women from the surrounding area. The company operates a state-of-the-art, climate-controlled processing and cold storage facility, strategically located near the Port of Durban to ensure fast and efficient access to global markets.

Tzamac

Hall 5A | Booth H-126

Since 1996, Tzamac has been processing premium macadamias in Limpopo, Northern South Africa. Their commitment to quality is underpinned by meticulous batch processing and robust traceability systems. This high standard is further strengthened by the direct involvement of three of their largest growers who also serve as factory directors – ensuring alignment, accountability, and consistency across every stage of production. They prioritize long-term partnerships over one-off transactions.

The company's lean, hands-on team delivers fast, flexible, and personalised service tailored to each client's specific needs. Deeply rooted in their local community and trusted by international markets, Tzamac is your reliable and ethical source for world-class macadamias.

A pioneer in Sri Lankan agriculture since 1992, Ellawala Horticulture is the creator of the Tom EJC mango – now the preferred variety for dry zones across the island. The company exports organic fresh mangoes and tropical fruits worldwide, grown on its own certified organic farms. In 2021, Ellawala launched a modern processing facility with five production lines for pulping, canning, freezing, and dehydrating. From tree-ripened harvest to finished product, everything is crafted with care and traceability.

With 70% of its 150 employees being local women, Ellawala is deeply committed to rural empowerment, sustainability, and delivering fruit products bursting with natural goodness.

Factoria-Agro

Hall 5A | Booth H-126

Since the foundation in 1993, Factoria-Agro has become one of Europe's leading producers of mustard, flaxseed, and coriander ingredients. In partnership with the Zaporizhzhia Oilseed Institute, Factoria-Agro pioneered mustard cultivation in Ukraine in the early 1990s and developed new seed varieties with low erucic acid levels and a high oil content.

Factoria-Agro's innovations combined with Ukraine's fertile soil and strong agricultural traditions, form the foundation of the family-owned company. Today, Factoria-Agro offers a broad range of ingredients, including natural essential mustard oil, natural mustard flavour, mustard flour, de-oiled mustard powder, mustard bran, mustard oilcake, mustard seeds, flaxseeds, flaxseed oil and oilcake, coriander seeds, ground coriander, and more.

Products & quantities per year

Orex Distribution (Hlibo®)

supported by OTGS
Hall 5A | Booth H-126

Orex Distribution (Hlibo™) is a vertically integrated Ukrainian bakery producer specializing in premium ambient-stable and frozen products, specifically hot dog buns and sesame seed burger buns. By controlling the entire supply chain – from local farming to the group's own milling and grain storage facilities – Orex guarantees 100% GMO-free, high-quality raw materials as well as price stability.

The company combines FSSC 22000-certified food safety with advanced ambient technology, delivering an impressive 2–3 month shelf life at room temperature. This eliminates the need for cold-chain logistics, offering exceptional cost efficiency and maximum flexibility for international retail and foodservice partners.

Products & quantities per year

Sunfill

Hall 5A | Booth H-126

Sunfill is a Ukrainian brand of healthy snacks, established in 2016 in Chernihiv. The company uses a unique low-temperature drying process (42–45°C) to preserve the natural vitamins and nutrients of its ingredients—without adding sugar, preservatives, or artificial additives. Its diverse product range includes snack bars, crispbreads, granola, and natural confectionery, designed for both children and adults seeking wholesome nutrition.

Since achieving FSSC 22000 certification in 2024, Sunfill has reinforced its commitment to the highest food safety standards. The company sources raw materials from trusted local Ukrainian producers as well as carefully selected international partners, ensuring consistent quality and sustainability.

Products

- Bars (strawberry-hazelnut, mango-coconut, pineapple-hazelnut, cherry-chili, marzipan, protein, peanut-coconut, peanut-pink salt)
- Crispbreads (vegetables, raisins, beet-root, tomatoes, mushrooms, seaweed)
- Granola (raw: almond-hazelnut, raisins-goji berries; oat: almond-coconut, nut-raisins)

Sirdarya Beans Export

Hall 5A | Booth H-126

Sirdarya Beans Export is Uzbekistan's leading exporter of pulses, located in the heart of the country's production regions. The company is a long-established family business with nearly 10 years of experience in pulse exports. Thanks to its extensive expertise and advanced technology, Sirdarya Beans is able to offer premium-quality products at competitive prices, including a wide range of pulses such as green mung beans, red and purple speckled kidney beans, yellow and red millet, and many others.

The exceptional colour, larger size, and excellent taste of Uzbekistan's pulses make them a premium choice. All products meet international standards, and the company is committed to transparency throughout the negotiation process.

Products & quantities per year

- Green mung beans / 30,000 t
- Red speckled kidney beans / 25,000 t
- Purple speckled kidney beans / 25,000 t
