

IPD at Health Ingredients Europe 2018

Meet reliable suppliers from Colombia, Egypt and Kyrgyzstan
Frankfurt | 27 – 29 November 2018

Protécnica Ingeniería S.A.S.

Available at CBI booth in Hall 8L92

With more than 40 years of experience in the manufacturing of chemical specialties, Protécnica Ingeniería has carried out a research on the properties of the nuts produced by the Lecythis Minor tree, also known as “Monkey Pot”. This tree grows in the rich and fertile soil of the Colombian Caribbean, along the banks of the mythical Magdalena River, in the middle of a virgin ecosystem, around the valleys where low-income communities live.

As a major step to protect the trees, Protécnica supports communities through the purchase of the nuts. With this the company has three main goals: the development of low-income communities, the protection of biodiversity and the supply of oil of natural origin and other derivatives such as natural selenium. The oil that is extracted is rich in fatty acids, antioxidants, vitamins and has anti-aging properties tested in Derma Consult Concept GmbH Bonn - Germany laboratories with 90% positive results in wrinkles and 85% elasticity and firmness.

Products & quantities per year

- + 100% natural Lecythis Minor seed oil / 5 mt

Certifications

- + ISO 9001
- + KOSHER
- + GMP (in process)

Source of raw material

- + The tree “Lecythis Minor”, growing in Colombia

Sero Colombia S.A.S.

Available at CBI booth in Hall 8L92

EXPORTER
from Colombia

SERO is an agribusiness specializing in exporting tropical fruit solutions. Their portfolio includes an ample experience in freeze-drying and air-drying for the food industry, as well as their recent portfolio extension into powders for the health and cosmetic industries with high value added products like aloe vera.

100% natural + unaltered flavour and colour + long shelf life – all within the same product. SERO's mission is to enable the access to natural, functional and convenient ingredients while ensuring the highest quality and food safety standards. Their aim is to empower people, their natural talents and capability for innovation, and to share Colombia's quality production with the world.

Products & quantities per year

- + Freeze-dried tropical fruit powders (e.g. aloe vera 100x or 200x, organic acai, organic and conventional banana, pineapple, mango, avocado) / 60 mt
- + Air-dried fruit powders (e.g. green banana flour) / 100 mt

Certifications

- + ORGANIC (EU, US, Canada)
- + ISO 22000
- + KOSHER
- + FSSC 22000 (in process)

Source of raw material

- + Colombia

Tiba Starch & Glucose Manufacturing Co.

Hall 8F 100

Tiba Starch & Glucose Manufacturing Co. is the only company in the Middle East that is specialized in producing sweeteners (liquid and powder form) derived from rice.

With about 120 employees, the company is realizing an annual revenue of 6,000,000 USD by selling its glucose, maltodextrin and rice protein as well as rice flour to the local market and Europe.

The production side of Tiba is equipped with modern machinery that is certified with food safety certificates such as ISO 22000. In order to extend the product range, the latest investment of Tiba was a spray dryer.

Products & quantities per year

- + Glucose (syrup & powder) / 15,000 mt
- + Maltodextrin (syrup & powder) / 4,000 mt
- + Rice protein (food & feed grade)
- + Rice flour
- + Fat powder 35% originated from palm and coconut oil
- + Tomato powder from natural constituents

Certifications

- + ISO 22000, 9001, 18000
- + HALAL
- + GMO-Free

Source of raw material

- + Own farm in Ismailia
- + Traders

Biovit Ltd.

Available at CBI booth in Hall 8L92

The limited liability company Biovit works in two directions: production of medicines and dietary food supplements. The company is driven by innovation and validation of ingredients which can be found in Kyrgyzstan.

In 2016, Biovit completed the construction of its new plant, where different kinds of extracts, medicines and food supplements are produced in a highly controlled environment. In 13 years of production activity, Biovit not only has expanded the range of products, but has also expanded into diverse sales markets, such as Russia, Ukraine and even Germany. While not all pharmaceutical products can be exported to the European Union, many of the extracts and supplements are exportable to European buyers.

Products

- + Different types of extracts (licorice, camomile, calendula, etc.)
- + Mumyo (stone oil) extract
- + Mumyo, tooth elixir ailment
- + Mumivenol, tooth elixir kirslavin
- + Vitapro
- + Different vitamin supplements (magnesium, zinc, ferrum, etc.)
- + Vitamin complex for flour enrichment
- + Gulazyk (vitamin complex by request of UNICEF)

Certifications

- + ISO 9001: 2015
- + HACCP

Source of raw material

- + Local raw materials collected and cultivated
- + Purchased raw materials also from outside Kyrgyzstan for certain products
